Our Game

BladeGunners is a first-person, online arena shooter game. It utilises skating movement mechanics to allow for rail grinding on certain objects in the arena which will charge up the player's energy-based weapon.

Set in the distant future where bullets are a thing of the past, private weapons manufacturers seek to covertly field test their weapons through gameshow sponsorships. Players are placed into 2 teams of 4 and must face each other in a deathmatch for the highly desired grand prize. Are you ready Plazmoids?
